

# Gulf of Mexico Harmful Algal Bloom Bulletin

Region: Texas

24 August 2010

NOAA Ocean Service

NOAA Satellites and Information Service

NOAA National Weather Service

Last bulletin: August 17, 2010

Satellite chlorophyll image with possible HAB areas shown by red polygon(s). Cell concentration sampling data from August 15 to 23 shown as red (high), orange (medium), yellow (low b), brown (low a), blue (very low b), purple (very low a), pink (present), and green (not present). For a list of cell count data providers and a key to the cell concentration categories, please see the HABFS bulletin guide:

[http://tidesandcurrents.noaa.gov/hab/habfs\\_bulletin\\_guide.pdf](http://tidesandcurrents.noaa.gov/hab/habfs_bulletin_guide.pdf)

Please note the following restrictions on all SeaWiFS imagery derived from CoastWatch.

1. Data are restricted to civil marine applications only; i.e. federal, state, and local government use/distribution is permitted.
2. Image products may be published in newspapers. Any other publishing arrangements must receive GeoEye approval via the CoastWatch Program.

## Conditions Report

There is currently no indication of a harmful algal bloom at the coast in Texas. No impacts are expected alongshore Texas today through Monday, August 23.

## Analysis

There is currently no indication of a harmful algal bloom along the coast of Texas. Forecast models indicate a potential maximum transport of 15 km north along the coast from Port Aransas from August 22-26.

-Tomlinson, Kavanaugh

Wind speed and direction are averaged over 12 hours from buoy measurements. Length of line indicates speed; angle indicates direction. Red indicates that the wind direction favors upwelling near the coast. Values to the left of the dotted vertical line are measured values; values to the right are forecasts. Wind observation and forecast data provided by NOAA's National Weather Service (NWS).

## Wind Analysis

Southeast winds are expected tonight (5-10 knots) and shifting northeasterly Wednesday through Friday. An increase to 10-15 knots is expected Wed-Fri.
